GLITTER TERMS	
Holographic	A 3-D rainbow effect created when light is shined on it.
Opal	Opal glitter shifts color on light and dark backgrounds, and typically has pink and/or green undertones.
Translucent	Semi-transparent pieces of glitter.
Iridescent	Glitter that shows different colors when viewed from different angles.
Undertones/Tones	Secondary subtle colors visible in the glitter.
Shards	Irregular shapes of glitter (similar to shards of glass).

### DISCLAIMER

These color descriptions are based upon the opinion of the 143Vinyl team. Please keep in mind that color varies by the screen it is viewed on, and each person's subjectivity. Use these color descriptions to help differentiate each glitter color to find the perfect fit for your projects!
